Property Owners

1/33 Amy Street
Morayfield QLD 4506

Dear Property Owners,

Please find within this document your tax depreciation schedule for the property mentioned above. The schedule has been prepared in accordance with the Income Tax Assessment Act 1997 (ITAA97) and subsequent amendments to ensure that you receive the best possible depreciation allowances on your investment property.

This report is to be used solely by the persons addressed above for depreciation claims as it contains information that is suitable to their needs and circumstances and will become void should the title or ownership of the property be transferred. Should the particulars of this report be inaccurate, it is the responsibility of the recipient to advise our office. The depreciation schedule advises depreciation claims only and is not to be used for any other purpose.

Duo Tax have provided methodology to support calculations throughout this report primarily to assist you in understanding your assets and how they are depreciated. However, should you feel the information does not provide clarity or you may have further queries, please contact our quantity surveyor and they will endeavour to help.

Duo Tax has assumed that the property is purely used for the purposes of investment so any apportioning of private use must be done by the person using the report, and that GST credit cannot be claimed by the person using the report so GST has been included for the items in the schedule.

Should the issue of this document supersede any former reports issued by Duo Tax, please ensure that prior reports are no longer used.

Yours faithfully,

Duo Tax Quantity Surveyors

Depreciation Schedule Tabulated Calculations ***12***

First Financial Year's Apportioned Depreciation

The first year's claim is adjusted to coincide with the day the property is available for rent (i.e. the date assets are acquired for income producing purposes) and does not represent a full year's depreciation as it has been pro-rated up to 30th June. Thus no further adjustment is required.

Classes of Assets for Depreciation

A depreciation schedule determines two distinct classes of deductible assets and is described

Tax Reference	Description
Division 40 Plant & Equipment	Assets that are easily removable from a building rather than attached or fixed in such a way that it becomes an element that is part of the building. These include appliances and furnishings. Each item of plant or equipment within your property has an effective life measured in number of years. The effective life is determined by the tax commissioner under the latest Taxation Ruling - Income tax: effective life of depreciating assets. It is used to calculate the assets decline in value.
Division 43 Capital Works	Claiming the expense or outlay incurred in construction of capital works that may include assets such as the building and any structural improvements undertaken for use in a deductible way or to produce an income in a given financial year. The cost of construction is formulated by including items such as concrete slab, timber-stud framing, windows, plasterboard, doors, roofing and other fixed components that would be deemed as depreciable. Soft landscape or organic items such as plants and soils are not eligible for depreciation.

Plant and equipment fall under the Division 40 asset class and are depreciated as per the following methods:

Effective life depreciation

For any other items that do not fall within the below criteria as immediately written-off or low-value pooled items, they will be depreciated as per the effective life schedule.

Immediate write-off

Eligible plant and equipment items with a cost of $300 or less qualify for an immediate full deduction and have been applied accordingly in the calculations. Small businesses may also qualify for small-business write-off grants. The accelerated rates of depreciation have been applied accordingly however, should the business not qualify for this write-off, please inform our office to update your report.

Low value pool

Assets that are purchased in the current financial year worth less than $1,000 (low-cost assets) and also those assets that have been acquired prior to the current financial year and currently worth less than $1,000 (low-value assets) are eligible for the low-value pool; these are depreciated as follows:

- 18.75% in the first year (applicable to low cost assets only)
- 37.5% in the subsequent years (applicable to all assets less than $1,000)

9th of May 2017 - Limits to depreciation for second-hand assets

The Federal Budget announcement for 2017 has confirmed changes to claims of depreciation that may affect Australian Residential Property Investors whom are purchasing properties after 7:30pm on the 9th of May 2017. Duo Tax Quantity Surveyors have taken into consideration the changes and the advice on depreciation within this report generally complies with the ruling found in the ITAA97 s 40-27 Further reduction of deduction for second-hand assets in residential property.

If the residential property contains second-hand plant and equipment, a capital loss schedule has been prepared to value the assets from the date the property had been acquired by the owner whereupon the residual values at the start of each Financial Year have been determined through both depreciation methods starting with the first opening residual value beginning at the report start date. Where circumstances in which the property was used for other purposes thereafter, please seek the advice of a tax agent to understand your eligibility in claiming plant and equipment (Division 40) for future years.

Where applicable, certain exemptions have been applied based on the details provided by the client, particularly in regards to who the supplier is, the newness of the premise, and the timing of leases (if any), as per the exemptions given under ITAA97 s 40-27(4).

Exception to Division 40 - Substantial Renovations

Under Division 40-27 of the ITAA97, the 2017 amendment disallows rental property investors to claim depreciation on previously used plant and equipment assets. However, an exception is made under GST Ruling GSTR 2003/3, where 'Substantial Renovations' will be treated similarly to 'New Residential Premises' and as such, will be eligible to claim depreciation by the new residential property investor on previously used Plant and Equipment whereby a property that is purchased, has been substantially renovated prior to the sale of the property by the previous owner. Substantial renovations may include (but not necessarily has to include) removal or replacement of foundations, external walls, interior supporting walls, floors roof or staircases.

Division 43 specifically addresses the building write-off component of your property. The historical construction costs include fees for preliminary items such as design fees, engineering and building approval costs. Where actual costs are not known, a quantity surveyor has estimated this amount by determining the appropriate costs for the building/structural improvement of the asset as at the date it was constructed. The percentage rate at which the building depreciates is dependent upon when construction commenced and the intended use of the building i.e. commercial, industrial, short term accommodation or residential purposes. This percentage will either be 2.5% or 4% and has been applied accordingly with respect to the information provided to us. This is defined in the ITAA97 s 43-145 - Use in the 4% manner.

In some cases, the Division 43 component will not be applicable to your property if it was constructed prior to 15th September 1987 or the structural improvements made on your property occurred prior to 27th of February 1992. If this is the case, the 'Capital Works' component within the schedule on pages 9 and 10 will be purposely left blank. It is worth mentioning that the only method of depreciation for any capital works is via the prime cost method.

Demolition expenses have been excluded from this report because the tax implications for these expenses will depend entirely on the client's circumstances. For example, a demolition expense could be used to reduce amounts received from a demolition, as per ITAA97 s 43-250, or could have capital gains tax implications. It is advisable to seek advice from a tax agent on how your demolition expenses should be handled.

In cases where the property is used for other purposes such as commercial or manufacturing, the cut-off date for claims of depreciation on the construction cost (Division 43) differs that the asset owner may also claim 2.5% between 20th July 1982 through to 21st August 1984.

Diminishing Value Methodology

Within the depreciation schedule by diminishing value method, you will find immediate write-off, low value-pooling or otherwise effective life depreciation being used to calculate the appropriate deduction allowance for each item depending on these factors:

1) When the plant or equipment was acquired
2) When your property was first available for rent (ultimately the schedule start date)
3) How much the asset is worth at time of requiring this schedule
4) How long is the asset deemed to last based on the tax commissioner's guideline

Depreciation for building works is limited to the prime cost method and as such 'plant and equipment depreciation via diminishing value method must be paired with the building works depreciation to determine the complete allowable deductions for each financial year.

Prime Cost Methodology

This method of depreciation encompasses a 'straight-line' approach. Each financial year the assets are generally depreciated at the same rate that is applied directly off the prime or initial acquisition cost until such time that the item can be scrapped or written off.

Selection of Depreciation Method

In using this report for the purpose of making a claim for depreciation, one of the two methods explained above may be chosen. Once your method of depreciation has been chosen, all subsequent years will require you to continue applying the same method (ITAA97 s 40-130).

Jointly Held Property & Splitting of Assets

Each report is developed for the intended use for all owners of the property. The report is to be apportioned by your accountant depending on your entitlement.

Example, where the ownership is evenly split (50/50), apply 50% to the total.

Example: $5,000 in depreciation in 2016-17 with 2 owners (50% ownership per owner)

$5,000 x 50% = $2,500 depreciation per owner

Owner 1's tax deduction is $2,500

Owner 2's tax deduction is $2,500

Schedule Particulars

This depreciation schedule has been produced by integrating the following particulars, making this document bespoke to the needs of whom the report was intended for.

Asset owners	**Property Type**	Duplex (Side 1)
Property Owners	**Property Address**	1/33 Amy Street Morayfield QLD 4506
	Local Council Authority	Moreton Bay
	Settlement Date	18 April, 2024
	Year of Construction	2024
	Date of Structural Improvement	Not Applicable
	Report Start Date	18 April, 2024
	Rental Start Date	18 April, 2024
Building cost of the original structure at time of completion	**Initial Capital Works**	$161,217
Additional capital works by the owner or previous owners	**Capital Improvements**	Not Applicable
Residual cost of the original structure and/or capital improvements	**Capital Works (Div43)**	$161,217
May include additional fixtures	**Plant & Equipment (Div40)**	$29,492
	Total Expenditure	$190,709

The graphs below compare the total depreciation of the diminishing value method against the prime cost method. The general trend between the two depreciation methods is that the diminishing value method will allow for a greater depreciation amount in the earlier years while the prime cost method will have a greater amount of depreciation in the later years.

The first graph shows a year by year comparison while the second graph compares the accumulated depreciation.

See attached Annexure 1 – Diminishing value calculations for plant and equipment

See attached Annexure 2 – Prime cost calculations for plant and equipment

See attached Annexure 3 – Prime-cost calculations for capital works
